

Jalyna Schröder 🤖 | Software Engineer

jalyna.schroeder@gmail.com | <http://jalyna.io>

Full Stack Developer with a passion for people and data driven approach to web development. Experienced with large scaled web applications. Learns new technologies and agile methods in her spare time and is interested in leadership.

Experience

CTO Studentensteuererklärung 2016 May - Now

StudyClever started 2015 with a simple idea: Providing specialized tax tools (e.g. for students, soldiers, retirees) with a great User Experience to make tax declarations a joy.

- Taking over an existing Rails Application and implementing new features such as monetization and new tax tools in the whole stack
- Implementing processes such as code reviews, regression testing as well as basic Kanban
- Growing the internal Product Development Team

Full Stack Developer Descape 2016 Mar - 2016 May

Descape is a marketplace for sustainable travel experiences outside of the office.

- Taking over an existing Ruby on Rails application as the first developer in the company - Monitoring and keeping the application running

Team Lead Developer DaWanda 2013 Sep - 2016 Jan

DaWanda is an online marketplace for handmade products and supplies that is mostly developed in Ruby in a Scrum environment. DaWanda serves hundreds of millions of page impressions per month.

- Working with Ruby on Rails and Sinatra and developing RESTful APIs
- Frontend Development with Javascript in a MV* Framework and SMACSS architecture - Improving tooling and introducing peer reviews

Work Student Innobox GmbH 2012 Mar - 2013 Aug

Innobox is a web agency in the area of online shops mostly built with Groovy and Grails.
